Head Contractor: **Beltrame Civil Operations Pty Ltd**

Client: **City of Marion**

Project: **Berrima Road Culvert Upgrade**

Dear Resident,

Beltrame Civil have been engaged by the City of Marion to undertake the drainage upgrade within Sheidow Creek between Patpa Drive and Bella Drive. The scope of works includes the demolition of the existing pipe work below Berrima Road and the installation of a new culvert crossing, along with works along the creek channel.

We are intending to commence our project on Monday 7th March 2022.

To facilitate these works, Berrima Road will be closed to traffic and pedestrians from Patpa Drive to Bella Drive. Detours will be in place using Edward Beck Drive, Young Street, Lander Road and Patpa Drive. The footpath will also be closed from Berrima Road to Lander Road, with pedestrians/cyclists required to use the footpath along Patpa Drive.

Property access at 25 and 30 Berrima Road will still be possible. It will be necessary to occasionally restrict traffic movements for our construction works, but we will endeavour to ensure access to your property is available at all times.

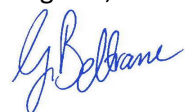

Commencement of onsite works will be from 7.00am to 5.00pm Monday to Friday, with weekend works occasionally possible.

Your ongoing assistance, co-operation and support would be greatly appreciated by both Beltrame Civil and the City of Marion. If you do have any enquiries regarding these works, the following persons may be contacted during business hours.
