## **2. SUMMARY OF ANTICIPATED SOURCES OF LOCAL NUISANCE GENERATED BY THE ACTIVITY**

All reasonable measures must be taken to minimise the impacts of local nuisance in the form of dust, odour, noise, vibration, smoke and fumes. It is the responsibility of the persons undertaking this activity to minimise nuisance and communicate with those potentially impacted.

For small scale construction activity, completion of following section will be taken to constitute a Site Nuisance Management Plan.

### **Map**

Include a map showing the following: the proposed location of the activity, the likely fixed sources of local nuisance, the location of premises occupied by persons potentially affected by the nuisance and the distance of these premises from those sources.

# Assessment of the potential for local nuisance

On the table below, summarise the sources of local nuisance (as identified on the map) and the communication strategy to

Source of local nuisance	Strategies to minimise and manage nuisance	Strategies to monitor nuisance	Identification of potentially affected premises	Distance from source <sup>2</sup>	Communication Strategy	Timeframe
<i>Eg Concrete truck</i>			<i>2 Egbert Place</i>	<i>50m</i>	<i>Letter drop to resident</i>	<i>Two days before proposed concrete pour</i>

<sup>2</sup> Distance from the source – should be measured from the source of the noise to a place on the noise affected premises that is within or near, and at the same approximate elevation as, an area frequented by persons residing, working or sleeping at the premises.
