

### Project Details

The upgrade will comprise of an avenue of 141 mature trees planted along the existing shared path through 3 connected open space reserves in Sheidow Park. Additional native trees will be planted in various locations throughout the reserve. New garden beds will be established with native plantings and infill native planting will be established in existing garden beds. New furniture will be installed which includes a chess table under the arbor, 2 new bench seats and a drinking fountain

Existing shared use path
